Atopic Dermatitis

Shely

Shely (9) ♀

21.3.2009

Sister: Maya - 6

## CC: Atopic Dermatitis

3 weeks ago they decided to stop the creams.

It started year and a half ago.

She got acupuncture treatments but it worsen her condition.

Appear in the hand and knee, now also in the ribs.

Not scratching and not suffer to much, but it is an esthetic problem.

Her sister suffer from asthma.

Usually she is healthy.

Not eating good. Don't eat fruits or vegetables.

She has two parts – she can play girls plays and dance ballet and can act as a tomboy.

Perfectionist.

Like to stay awake until late at night, in the morning jump out of bed like a panther.

**Pregnancy:** ✓.

**Birth:** Drainage of water 60 hours before birth, 3 sessions of Pitocin. AB to the vein, fungus in the breast and later on moved to the child mouth.

**AB:** First time a few months ago – Streptococcus A

**Sleeping:** Moving a lot, not talking too much. Dreams about death, her death, her mother death.

**Stools:** ✓.      **Vaccines:** ✓.

**Mood:** There are some tantrums – like her mother.

Use to have fears a year or two years ago, even at home – disappear by itself.
